

TIMOTHY KIMANI

FULL STACK ENGINEER

Software Engineer | Backend Engineer | Financial Systems Developer

kimanitimothy642@gmail.com | github.com/Timothy970 | linkedin.com/in/timothy-kimani-9966841a2

PROFESSIONAL SUMMARY

Full Stack Engineer with over 3 years of experience designing, developing and supporting secure web, mobile and backend applications in the financial technology sector. Experienced in building high-performance systems for payment processing, cross-border money transfers, messaging platforms and third-party integrations using Go, PHP, JavaScript and modern frontend frameworks. Skilled in RESTful APIs, SQL databases, Docker, Kubernetes, Linux and Agile software development. Passionate about delivering scalable, secure and maintainable solutions while collaborating with cross-functional teams throughout the software development lifecycle.

CORE COMPETENCIES

Full Stack Development • Financial Systems Development • REST & SOAP API Development • Payment Integrations • SQL Database Design • Microservices • Docker & Kubernetes • Linux • Agile Software Development • Production Support • API Security • Performance Optimization

EXPERIENCE

Roamtech Limited Solutions — Software Engineer

2023 – Present

Develop and maintain scalable web, backend, and mobile applications across multiple enterprise products, contributing throughout the software development lifecycle from design and implementation to deployment and production support. Collaborate with cross-functional teams to deliver secure, reliable, and high-performance software solutions.

Afrisend — Cross-Border Money Transfer Platform

Technologies: Go, PHP, Vue.js, React Native, MySQL, Redis, Docker, Kubernetes, Helm

- Developed secure backend services supporting local and international money transfers.
- Designed and implemented RESTful APIs consumed by web and mobile applications.
- Integrated banking systems, mobile money providers, payment gateways and foreign exchange partners using REST and SOAP services.
- Built transaction validation, reconciliation and retry mechanisms to improve payment reliability.
- Investigated and resolved production incidents while maintaining high system availability.
- Optimized SQL queries and backend workflows for high-volume transaction processing.
- Collaborated with QA teams during SIT/UAT and participated in production deployments.
- Worked within Agile development teams using Git, Docker and Kubernetes.

Emalify — Business Communications Platform

Technologies: PHP, Vue.js, MySQL

- Designed and implemented RESTful APIs and backend services for SMS delivery and messaging workflows.
- Developed reusable backend components and frontend modules, including template management and reporting features.
- Participated in requirement analysis, testing and production support.
- Collaborated with cross-functional teams to continuously deliver new functionality.

Adenzo — E-commerce Platform

Technologies: Go (Golang), Next.js, MySQL

- Developed scalable backend services using Go.
- Built REST APIs consumed by web applications.
- Implemented secure authentication and business logic.

- Developed responsive frontend functionality using Next.js.
- Performed code reviews, testing and production deployments.
- Worked in an Agile software development environment.

TECHNICAL SKILLS

Languages: Go (Golang) • PHP (Laravel) • JavaScript • TypeScript • SQL • HTML/CSS

Backend: REST APIs • Microservices • Express.js • Node.js • Secure API Development • Third-party Integrations • SOAP Services • Spring Boot (Basic)

Frontend: React • Vue.js • Next.js • Nuxt.js • React Native • Responsive UI

Databases: MySQL • Redis • Database Design • SQL Query Optimization

Cloud & DevOps: Docker • Kubernetes • Helm • Linux • Git • GitHub Actions

Development Practices: Agile/Scrum • SDLC • Unit Testing • Production Support • Debugging • Code Reviews

SELECTED PROJECTS

Blood Heroes — Blood Donation Management System

GitHub: <https://github.com/Timothy970/blood-donation-system> Live Demo: <https://blood-heroes-six.vercel.app/>

A full-stack blood donation platform that connects blood donors with recipients and healthcare facilities. Streamlines donor registration, blood requests, and inventory visibility.

Technologies: React, Node.js, Express, MySQL, REST APIs

AgroMarket — Agricultural Marketplace

GitHub: <https://github.com/Timothy970/AgroMarket> Live Demo: <https://agromarket-5c9k.onrender.com/>

An online marketplace connecting farmers directly with buyers, enabling efficient trading of agricultural products.

Technologies: React, Node.js, Express, MySQL, REST APIs

EDUCATION

Bachelor of Science in Information Technology

Kenyatta University
