

TIMOTHY KIMANI

SOFTWARE ENGINEER | FULL-STACK & MOBILE DEVELOPER

kimanitimothy642@gmail.com | github.com/Timothy970 | linkedin.com/in/timothy-kimani-9966841a2

PROFILE

Software Engineer with over 3 years of experience designing, developing, and maintaining scalable web, mobile, and backend applications. Experienced in building high-availability systems that process financial transactions, messaging services, and third-party integrations used by thousands of users. Passionate about developing reliable, secure, and maintainable software while collaborating with cross-functional teams to deliver solutions that solve real-world problems. Recognized for troubleshooting production issues, improving system reliability, implementing secure integrations, and developing scalable software across web, backend, and mobile platforms.

EXPERIENCE

Software Engineer

Roamtech Limited Solutions 2023 – Present

Develop and maintain scalable web, backend, and mobile applications across multiple enterprise products, contributing throughout the software development lifecycle from design and implementation to deployment and production support. Collaborate with cross-functional teams to deliver secure, reliable, and high-performance software solutions.

1. Emalify — Business Communications Platform

A cloud-based communication platform enabling businesses to send and manage SMS campaigns and customer communications.

Technologies: PHP, Vue.js, MySQL

- Developed and maintained backend services and frontend features for the SMS communication platform
- Built and integrated RESTful APIs for SMS delivery and messaging workflows
- Developed template management, messaging campaigns, and reporting features
- Improved system performance through query optimization and backend enhancements
- Collaborated with QA and product teams to deliver new features and resolve production issues

2. Adenzo — E-commerce Platform

A modern e-commerce platform supporting online product management, ordering, and business operations.

Technologies: Go (Golang), Next.js, MySQL

- Developed backend microservices using Go
- Built and consumed REST APIs to support e-commerce functionality
- Developed frontend features using Next.js
- Implemented secure authentication and business logic
- Optimized backend services for scalability and performance
- Participated in code reviews, testing, and production deployments

3. Afrisend — Cross-Border Money Transfer Platform

A financial platform facilitating secure local and international money transfers, payment processing, and integrations with banking and mobile money providers.

Technologies: Go, PHP, Vue.js, React Native, MySQL, Redis, Docker, Kubernetes

- Developed backend services for processing local and international money transfers
- Built integrations with banking systems, payment gateways, mobile money providers, and foreign exchange services
- Developed secure REST APIs supporting financial transactions
- Contributed to the React Native mobile application by implementing new features and integrating backend APIs
- Implemented transaction validation, retry mechanisms, and error handling to improve reliability
- Optimized MySQL queries and backend workflows for high-volume transaction processing

- Participated in Kubernetes deployments using Helm and Docker
- Troubleshooting and resolving production issues while improving system stability and performance

SKILLS

Backend Engineering	Frontend & Mobile	Cloud & Infrastructure	Databases & Practices
REST API Design	React	Docker	MySQL
Microservices	React Native	Kubernetes	Redis
Secure API Development	Vue.js	Helm	Query Optimization
Third-party Integrations	Nuxt.js	Linux	Database Design
Financial Systems	Responsive UI		Git Version Control
Queue Processing	State Management		Agile / SDLC
			Code Reviews
			Debugging
			Unit Testing
			Production Support

SELECTED PROJECTS

Blood Heroes — Blood Donation Management System

GitHub: <https://github.com/Timothy970/blood-donation-system>

Live Demo: <https://blood-heroes-six.vercel.app/>

A full-stack blood donation platform that connects blood donors with recipients and healthcare facilities. Streamlines donor registration, blood requests, and inventory visibility.

Technologies: React, Node.js, Express, MySQL, REST APIs

AgroMarket — Agricultural Marketplace

GitHub: <https://github.com/Timothy970/AgroMarket>

Live Demo: <https://agromarket-5c9k.onrender.com/>

An online marketplace connecting farmers directly with buyers, enabling efficient trading of agricultural products.

Technologies: React, Node.js, Express, MySQL, REST APIs

EDUCATION

Bachelor of Science in Information Technology

Kenyatta University
